

Velaro series 100

Striking facade design in appearance and function

Data sheet

Velaro series 100

A striking appearance, functional aesthetics, and uncompromising attention to detail – that’s facade design with the Velaro series. Embossed and punched facade elements in aluminum or stainless steel are an excit-

ing architectural tool to create impressive cladding effects, playing with alignments, mirroring, and reflected sunlight. At the same time, Velaro facades provide a long-lasting, weather-resistant, mainte-

nance-free, and valuable solution for both interior and exterior design.

Velaro 100 series stands out with its trendsetting techno-look and a fine matt finish.

Technical data:

Type	Material	Surface	Possible material thickness	Possible dimensions
Series 101	Aluminum ALMG1	E6 / EV1 anodized	2 mm	max. 4,000 x 1,500 mm
