

## **Velaro series 300**

Striking facade design in appearance and function

# Data sheet

## Velaro series 300

A striking appearance, functional aesthetics, and uncompromising attention to detail – that's facade design with the Velaro series. Embossed and punched facade elements in aluminum or stainless steel are an excit-

ing architectural tool to create impressive cladding effects, playing with alignments, mirroring, and reflected sunlight.

At the same time, Velaro facades provide a long-lasting, weather-resistant, mainte-

nance-free, and valuable solution for both interior and exterior design.

**Velaro 300 series stands out with its homogeneous surface look and moderate mirroring effects.**

### Technical data:

Type	Material	Surface	Possible material thickness	Possible dimensions
Series 301	AISI 304 / AISI 316L	2R acc. to DIN EN 10088-2	1.5 / 2 / 3 mm	max. 3,000 x 1,500 mm
Series 302	AISI 304 / AISI 316L	2B ground K240	1.5 / 2 / 3 mm	max. 3,000 x 1,500 mm
Series 303	AISI 304 / AISI 316L	2B acc. to DIN EN 10088-2	1.5 / 2 / 3 mm	max. 3,000 x 1,500 mm
