

## **Velaro series 400**

Striking facade design in appearance and function

# Data sheet

## Velaro series 400

A striking appearance, functional aesthetics, and uncompromising attention to detail – that's facade design with the Velaro series. Embossed and punched facade elements in aluminum or stainless steel are an excit-

ing architectural tool to create impressive cladding effects, playing with alignments, mirroring, and reflected sunlight. At the same time, Velaro facades provide a long-lasting, weather-resistant, mainte-

nance-free, and valuable solution for both interior and exterior design.

**Velaro 400 series stands out with its extraordinary optical alignments and its sumptuous brushed finish.**

### Technical data:

Type	Material	Surface	Possible material thickness	Possible dimensions
Series 401	AISI 304 / AISI 316L	2B polished K240	2 mm	max. 3,000 x 1,500 mm
