

Velaro series 500

Striking facade design in appearance and function

Data sheet

Velaro series 500

max. length: 3,000 mm

A striking appearance, functional aesthetics, and uncompromising attention to detail – that's facade design with the Velaro series. Embossed and punched facade elements in aluminum or stainless steel are an excit-

ing architectural tool to create impressive cladding effects, playing with alignments, mirroring, and reflected sunlight.

At the same time, Velaro facades provide a long-lasting, weather-resistant, maintenance-free, and valuable solution for both interior and exterior design.

Velaro 500 series stands out with its unusual optical alignments and a sumptuous brushed finish.
